

Assignment WW-M0 due 04/10/2020 at 11:59pm EDT

1. (1 point) Solve the system

$$\begin{aligned} 2x - 6y &= 1, \\ -3x + 9y &= -3. \end{aligned}$$

Your answer is _____

If there is more than one point, type the points separated by a comma (i.e.: (1,2),(3,4)).

If the system has no solutions, type *none* in the answer blank.

Correct Answers:

- none

2. (1 point)

Solve the system using matrices (row operations)

$$\begin{cases} 8x - y = -13 \\ x + y = -5 \end{cases}$$

$x =$ _____

$y =$ _____

Correct Answers:

- -2
- -3
